

Skill Programs for Shubhashree College Students

Closing the gap between classroom and career

PREPARED FOR
Shubhashree College of Management

PREPARED BY
PRIXA Academy

DATE
29 September 2026

→ 5 programs
Each as a 1 week or
1 month course

Client

Shubhashree College of Management

Programs

5 programs

Options

1 Week or 1 Month

Class hours

2 hrs per day

Delivery

On-campus, your schedule

Group size

Priced for 40 students

1. Overview

Students learn a lot in class, but companies ask for skills they can use on day one. PRIXA Academy runs short, hands-on programs that close this gap. Students do not just listen. They build, present and finish real work with trainers who work in the industry.

The 5 programs

Program	Who it is for	1 Week	1 Month
AI for Everyone	Every student, any subject	10 hrs	40 hrs
UI/UX Design	Students who like design and apps	10 hrs	40 hrs
Digital Marketing	Business and management students	10 hrs	40 hrs
Cloud Practitioner	Students new to cloud and IT	10 hrs	40 hrs
AWS Solutions Architect (SAA)	Students ready for the advanced cloud exam	10 hrs	40 hrs

How we can deliver

Format	What it means
Full course	Run 1 Week or 1 Month as a regular batch at the college.
Workshop	We can also deliver any program as a short workshop (1 or 2 days) in the format the college wants.
Your schedule	The college picks dates and timings. We fit around exams and class hours.
Certificate	Every student who completes the course gets a PRIXA Academy certificate.

1 Week = 5 days x 2 hrs = 10 hrs. 1 Month = 20 days x 2 hrs = 40 hrs.

2. AI for Everyone

No coding and no tech background needed. Students learn what AI is, how to talk to it, and how to use it to study faster, work smarter and create more.

Option A: 1 Week (5 days, 2 hrs/day, 10 hrs)

Day	Topic	What students do
1	What AI is	Plain-language basics with real examples from daily life
2	Talking to AI	Write clear instructions (prompts) and get better answers
3	AI for study and research	Summaries, notes, assignments and slides done faster
4	AI for images and video	Make posters, images and short videos with free tools
5	Mini project	Solve one small problem with AI. Learn safe and honest use

Option B: 1 Month (4 weeks, 5 days/week, 40 hrs)

Week	Focus	What students build or do
1	AI basics	Understand AI tools and write strong prompts
2	AI for study and writing	Research, notes, reports, and checking facts
3	AI for work	Marketing posts, emails, business ideas and office tasks
4	Final project	Solve a real problem with AI and present it to the class

Pricing

Option	Duration	Per student	Full batch (40 students)
1 Week	10 hrs	NPR 4,500	NPR 1,40,000
1 Month	40 hrs	NPR 12,000	NPR 3,80,000

3. UI/UX Design

Students learn how to design apps and websites that people find easy to use, from the first sketch to a clickable design they can show employers.

Option A: 1 Week (5 days, 2 hrs/day, 10 hrs)

Day	Topic	What students do
1	What UI/UX is	See good and bad designs. Learn how designers think
2	Understanding users	Talk to real users and find what they need
3	Sketches and layouts	Draw the first version of an app screen on paper
4	Designing in Figma	Build clean screens with colour, text and buttons
5	Clickable design	Link screens together and present the design

Option B: 1 Month (4 weeks, 5 days/week, 40 hrs)

Week	Focus	What students build or do
1	Design basics	Layout, colour, fonts and spacing
2	Research and user paths	Interviews, user problems and step-by-step flows
3	Figma hands-on	Design full screens and a clickable prototype
4	Full app project	Design a complete app and add it to a personal portfolio

Pricing

Option	Duration	Per student	Full batch (40 students)
1 Week	10 hrs	NPR 6,000	NPR 1,90,000
1 Month	40 hrs	NPR 18,000	NPR 5,70,000

4. Digital Marketing

Students learn how brands find customers online: search, social media, paid ads and email. They finish by planning a real campaign.

Option A: 1 Week (5 days, 2 hrs/day, 10 hrs)

Day	Topic	What students do
1	Digital marketing basics	How online marketing differs from traditional, with real brand examples
2	SEO and content	How search works, finding keywords, writing content that gets found
3	Social media	Pick the right platform and plan a week of posts
4	Paid ads and email	Ad basics, budgets, email lists and subject lines
5	Analytics and pitch	Read a report in plain words. Teams present a campaign idea

Option B: 1 Month (4 weeks, 5 days/week, 40 hrs)

Week	Focus	What students build or do
1	Foundations and SEO	Customer journey, keywords and content ideas
2	Social media and content	Build a full month of posts for a brand
3	Paid ads and email	Draft ads and email campaigns with small test budgets
4	Analytics and live pitch	Read results and pitch a full campaign to a panel

Pricing

Option	Duration	Per student	Full batch (40 students)
1 Week	10 hrs	NPR 5,500	NPR 1,75,000
1 Month	40 hrs	NPR 15,000	NPR 4,80,000

Tools: ChatGPT (or a similar AI tool) is used in class. Each student or pair needs one device with internet.

5. Cloud Practitioner

Students learn what cloud computing is and how companies use it, using Amazon Web Services (AWS). It prepares them for the AWS Cloud Practitioner exam.

Option A: 1 Week (5 days, 2 hrs/day, 10 hrs)

Day	Topic	What students do
1	What cloud is	Why companies move to the cloud, in simple terms
2	Core AWS services	Servers, storage and databases: what each one does
3	Security	Who protects what, and how to keep an account safe
4	Pricing and billing	How AWS charges and how to avoid surprise bills
5	Practice exam	Exam-style questions with answers explained

Option B: 1 Month (4 weeks, 5 days/week, 40 hrs)

Week	Focus	What students build or do
1	Cloud basics	Set up a free AWS account. Learn the main ideas
2	Core services hands-on	Launch a server, store files and create a database
3	Security, pricing, support	Cover every exam topic with examples
4	Exam preparation	Full mock exams and a personal study plan

Pricing

Option	Duration	Per student	Full batch (40 students)
1 Week	10 hrs	NPR 6,500	NPR 2,05,000
1 Month	40 hrs	NPR 16,000	NPR 5,10,000

The AWS exam fee is paid to AWS by the student and is not included in the price.

6. AWS Solutions Architect (SAA)

For students who already know cloud basics. They learn to design cloud systems that are safe, fast and affordable, and prepare for the AWS Solutions Architect Associate exam.

Option A: 1 Week (5 days, 2 hrs/day, 10 hrs)

Day	Topic	What students do
1	Design basics	How to plan a cloud system that does not break
2	Networking	Build a private network (VPC) in AWS
3	Storage and databases	Pick the right storage and database for each need
4	Security and uptime	Keep systems safe and running when something fails
5	Practice questions	Exam-style scenario questions with answers explained

Option B: 1 Month (4 weeks, 5 days/week, 40 hrs)

Week	Focus	What students build or do
1	Servers and networking	Hands-on labs with servers, networks and load balancing
2	Storage and databases	Design data systems for speed, safety and cost
3	Security, scaling, backup	Build systems that grow and recover on their own
4	Design cases and mock exams	Solve real business cases and full-length practice exams

Pricing

Option	Duration	Per student	Full batch (40 students)
1 Week	10 hrs	NPR 8,000	NPR 2,50,000
1 Month	40 hrs	NPR 22,000	NPR 7,00,000

Best for students who have finished Cloud Practitioner or know cloud basics. The AWS exam fee is paid to AWS by the student and is not included.

7. Pricing Summary

Program	1 Week / student	1 Month / student	1 Week / batch of 40	1 Month / batch of 40
AI for Everyone	NPR 4,500	NPR 12,000	NPR 1,40,000	NPR 3,80,000
UI/UX Design	NPR 6,000	NPR 18,000	NPR 1,90,000	NPR 5,70,000
Digital Marketing	NPR 5,500	NPR 15,000	NPR 1,75,000	NPR 4,80,000
Cloud Practitioner	NPR 6,500	NPR 16,000	NPR 2,05,000	NPR 5,10,000
AWS Solutions Architect (SAA)	NPR 8,000	NPR 22,000	NPR 2,50,000	NPR 7,00,000

Pricing excludes VAT. Payment terms and split to be confirmed separately. Batch prices are for one group of 40 students and can change with final group size and scope. Pricing is negotiable.

8. Workshops

Not ready for a full course? We can run any of the 5 programs as a workshop (1 or 2 days). The college chooses the topic, dates and length. Workshop pricing is shared once the topic, days and student count are set.

9. What the College Provides

Item	Need
Classroom	One room with a projector and seats for the batch
Devices	One laptop or computer with internet for each student or pair
Software	Free accounts only (AI tools, Figma, AWS free tier). We guide students on setup

10. Trainers

Classes are taught by PRIXA Academy trainers who work in the field. The trainer for each program is confirmed before the batch starts.
